

Project Title

Full Stack Blog Management Application

1. Project Overview

This project is a **Full Stack Blog Management Application** developed using the MERN stack. The application allows users to create, view, edit, and delete blog posts through a user-friendly interface. It demonstrates real-world implementation of frontend-backend integration, RESTful APIs, and database operations.

2. Objectives of the Project

- To understand full stack web application architecture
 - To implement CRUD operations using REST APIs
 - To integrate frontend with backend services
 - To work with MongoDB database using Mongoose
 - To follow professional project structure and coding practices
-

3. Technology Stack

Frontend

- React.js
- React Hooks
- React Router DOM
- CSS

Backend

- Node.js
- Express.js

Database

- MongoDB
- Mongoose

4. Project Architecture

The project follows **Client–Server Architecture** where:

- Frontend handles user interaction
- Backend manages APIs and business logic
- MongoDB stores blog data

5. Project Directory Structure

Backend Structure

```
blogapp/
├── backend/
│   ├── server.js
│   ├── .env
│   ├── config/
│   │   └── DB.js
│   ├── models/
│   │   └── blogModel.js
│   ├── routes/
│   │   └── postRoutes.js
│   └── uploads/
```

Frontend Structure

```
frontend/
├── src/
│   ├── App.jsx
│   ├── App.css
│   ├── main.jsx
│   ├── index.css
│   └── assets/components/
│       ├── AddPost.jsx
│       ├── Card.jsx
│       ├── CreatePost.jsx
│       ├── EditPost.jsx
│       ├── ViewPost.jsx
│       └── PostDetail.jsx
```

6. Core Features

1. View all blog posts
2. View individual blog post details
3. Create a new blog post
4. Edit existing blog posts
5. Delete blog posts

7. Functional Modules

Blog Management Module

- Add new blog posts
- Edit blog content
- Delete blog posts

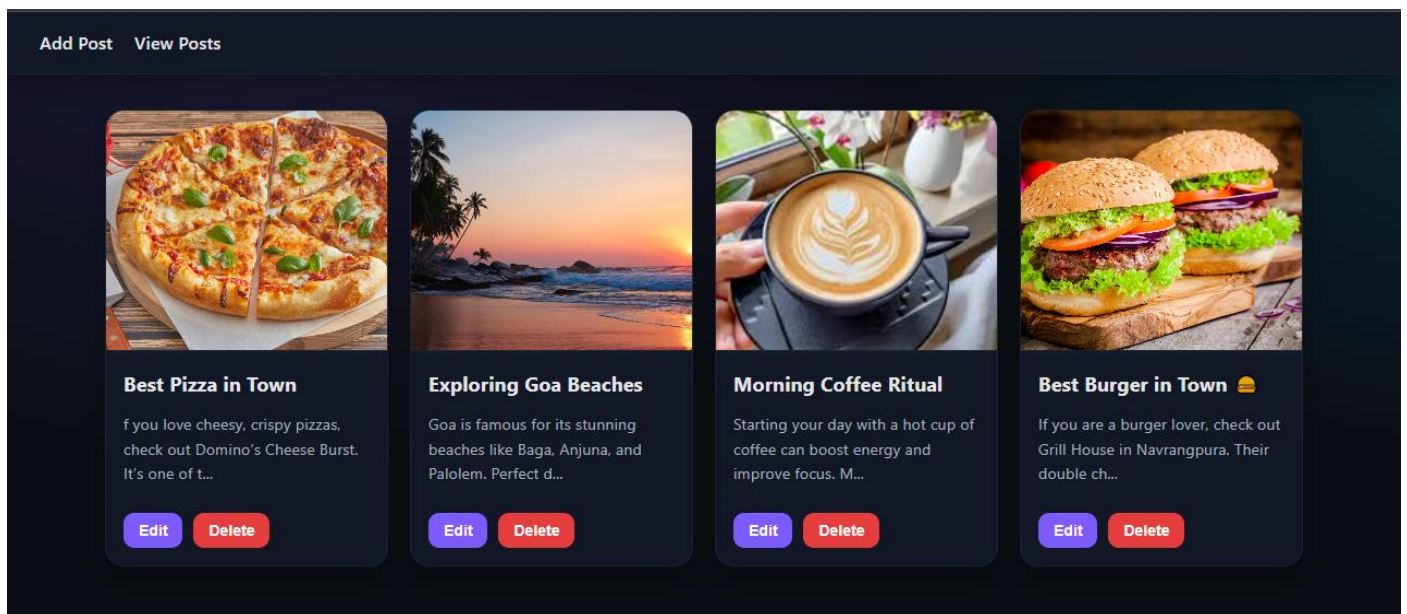

Post Display Module

- Display list of all posts
- Show detailed post view

8. User Interface Description

Home Page

- Displays all blog posts in card layout

Add Post Page

- Form to create a new blog post

A screenshot of the "Add Post" page. At the top, there are two links: "Add Post" and "View Posts". Below them is a large, dark gray form titled "Add New Post". The form contains three input fields: "Title", "Content", and a file upload field labeled "Choose File" with the text "No file chosen" next to it. At the bottom right of the form is a purple "Add Post" button.

Edit Post Page

- Update existing blog post data

[Add Post](#) [View Posts](#)

Edit Post

Best Pizza in Town

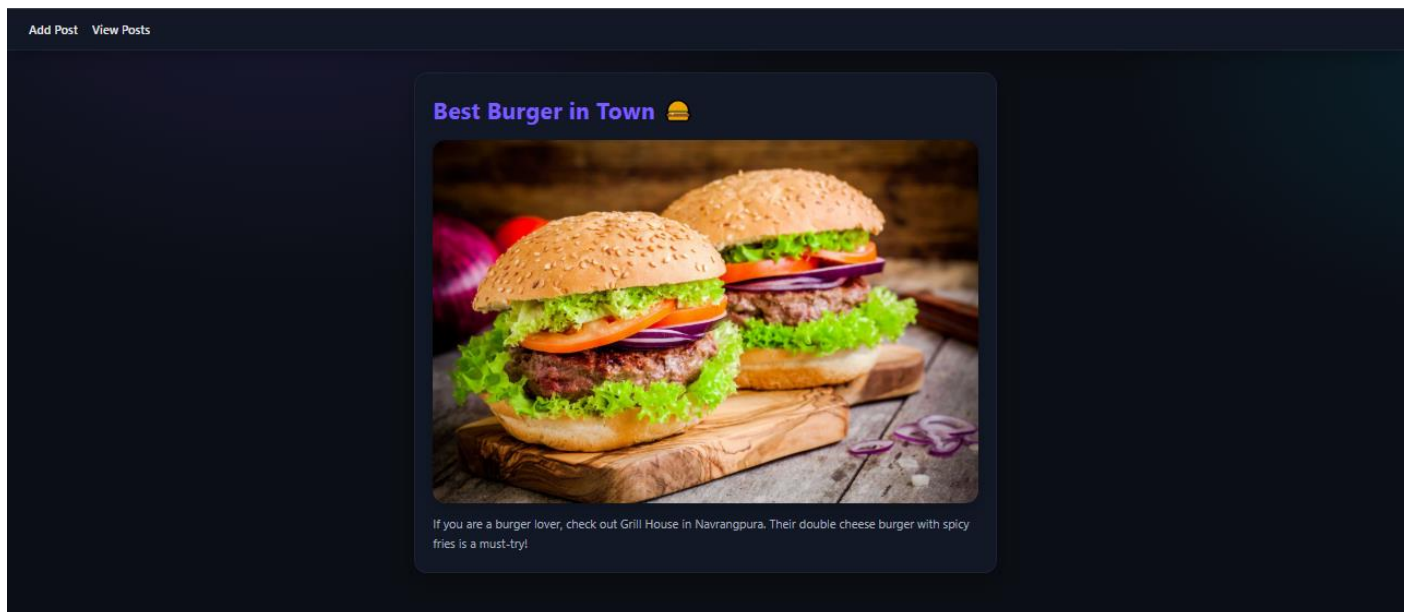

f you love cheesy, crispy pizzas, check out Domino's Cheese Burst. It's one of the most loved food items for gatherings and late-night cravings.

Current Image:

No file chosen

Post Detail Page

- Shows full blog content with title and description

9. Security & Validation

- Input validation on frontend
- API error handling
- Environment variable usage for database security
