

Q1. Build a Personal Profile Webpage.

1. Use **HTML** to structure the following sections:
 - Profile Picture and Name
 - About Me section
 - Skills list
 - Contact Form
2. Use **CSS** to:
 - Style the layout attractively (fonts, colors, spacing)
 - Make the webpage responsive using media queries
3. Use **JavaScript** to:
 - Validate the contact form (e.g., check if fields are filled)
 - Show an alert on successful form submission

Q2. To-Do List Web App.

1. An input field to enter tasks
2. An "Add" button to add tasks to the list
3. Display the list of tasks below the input
4. Allow user to:
 - Mark tasks as complete (e.g., strike through text)
 - Delete a task
