PRACTICAL EXERCISE OF Node Js

AN ISO 9001:2015 CERTIFIED INSTITUTE

COSMOS

The Real Training Centre

Exercise of Node Js

➤ Chapter:-1

- 1) Introduction
- 2) Create First Node Js file.
- 3) Implement Basic of JS. (Loop, Array, Conditions and Function)
- 4) Demonstrate to Import File.

➤ Chapter:-2

- 5) How to get input from Command Prompt?
- 6) How to Display List of Files in Directory?
- 7) Demonstrate CRUD Operation with File System.

➤ Chapter:-3

- 8) Learn how to store data using local storage in Node.js
- 9) Update Data in Local Storage
- 10) Deleting Data from Local Storage
- 11) Clear All Data from Local Storage
- 12) Check If Data Exists in Local Storage

➤ Chapter:-4

- 13) Demonstrate Creating a Basic Server.
- 14) Install nodemon Package.
- 15) Demonstrate Creating Basic API.

➤ Chapter:-5

- 16) How to Handle Asynchronous Data?

➤ Chapter:-6

- 17) Install Express Js Package.
- 18) Create basic routing with parameters.
- 19) Render HTML and JSON using express js.
- 20) Render HTML files in express js.
- 21) Remove extension (.html) from URL.

➤ Chapter:-7

- 22) Demonstrate basic middleware.
- 23) Demonstrate router level middleware.

➤ **Chapter:-8**

- 24) Install mongo compass in your system.
- 25) Implement basic commands of mongodb.
- 26) Install mongodb package.
- 27) How to connect mongodb.
- 28) Read data from mongodb.
- 29) Insert data in mongodb.
- 30) update data in mongodb.
- 31) Delete data in mongodb.
- 32) Create GET API with mongodb.
- 33) Create POST API with mongodb.
- 34) Create PUT API with mongodb.
- 35) Create DELETE API with mongodb.

➤ **Chapter:-9**

- 36) Install mongoose package.
- 37) Demonstrate CRUD operation with mongoose.
- 38) Create GET API with mongoose.
- 39) Create POST API with mongoose.
- 40) Create PUT API with mongoose.
- 41) Create DELETE API with mongoose.
- 42) Create search API with mongodb.

➤ **Chapter:-10**

- 43) Install MySQL package.
- 44) Create GET API with MySQL.
- 45) Create POST API with MySQL.
- 46) Create PUT API with MySQL.
- 47) Create DELETE API with MySQL.

➤ **Chapter:-11**

- 48) Install multer package.
- 49) Upload files using multer.
